Dagmar Schäfer is the director of Department III, "Artefacts, Action and Knowledge" at the Max Planck Institute for the History of Science in Berlin; Honorary Professor, History of Technology, Technical University, Berlin; Adjunct Professor, Institute of Sinology, Freie Universität, Berlin; and Guest Professor, School of History and Culture of Science, Shanghai Jiao Tong University, China.

Her main research interest is the history and sociology of technology of China, focusing on the paradigms configuring the discourse on technological development, past and present. She has published widely on materiality, the processes and structures that lead to varying knowledge systems, and the changing role of artefacts – texts, objects and spaces – in the creation, diffusion and use of scientific and technological knowledge. Her monograph *The Crafting of the 10,000 Things* (University of Chicago Press, 2011) won the Pfizer Award of the History of Science Society in 2012 and the Association for Asian Studies: Joseph Levenson Prize (Pre-1900) in 2013. Her current research focus is the historical dynamics of concept formation, situations, and experiences of action through which actors have explored, handled and explained their physical, social and individual worlds.
