

TABLE OF CONTENTS

- 1 Pedagogy and Research. Notes for a Historical Epistemology of Science Education *Massimiliano Badino, Jaume Navarro*
- 2 Sorting Things Out: Drude and the Foundations of Classical Optics *Marta Jordi Taltavull*
- 3 Max Planck as Textbook Author *Dieter Hoffmann*
- 4 Dissolving the Boundaries between Research and Pedagogy: Otto Sackur's *Lehrbuch der Thermochemie und Thermodynamik* *Massimiliano Badino*
- 5 Fritz Reiche's 1921 Quantum Theory Textbook *Clayton A. Gearhart*
- 6 Sommerfeld's *Atombau und Spektrallinien* *Michael Eckert*
- 7 Kuhn Losses Regained: Van Vleck from Spectra to Susceptibilities *Charles Midwinter, Michel Janssen*
- 8 Max Born's *Vorlesungen über Atommechanik, Erster Band* *Domenico Giulini*
- 9 Teaching Quantum Physics in Cambridge: George Birtwistle and His Two Textbooks *Jaume Navarro*
- 10 Paul Dirac and *The Principles of Quantum Mechanics* *Helge Kragh*
- 11 Quantum Mechanics in Context: Pascual Jordan's 1936 *Anschauliche Quantentheorie* *Don Howard*
- 12 Epilogue: Textbooks and the Emergence of a Conceptual Trajectory *David Kaiser*
